# Factory-Links

Factory-Link Catalogues

Factory-Links aim to provide all the parts you need in a single package at affordable prices. We strive to offer the industry a top-notch line of bearings, seal kits, and linkage kits.

- The most all-inclusive product line packaged in convenient kits.
- Quality design and construction to meet the roughest riding conditions.
- Competitively priced.
- Large range of stock with quick delivery.

Our service kits include all required parts for a complete overhaul and a return in quality to factory specs.

The making of pin and bearing making is a very precise business. The surface of the balls and pins as well as the races they roll on must be exceptionally smooth.

In order to ensure that Factory-Links kits achieve this standard tests are run on samples of steel coming to the factory to ensure that it contains the correct amounts of alloy metals.

Hardness and toughness tests are carried out during several stages of the heat treating process.

Inspections are carried out many times during the manufacturing process to make sure that sizes, shapes and tolerances are correct.

LET'S RIDE WITH FACTORY LINKS  
Parts certified for the most extreme conditions

## Front and Rear Wheel Bearing Kits

Factory-Links, advanced premium off-road, wheel bearing kits contain all elements required for a full service of your wheel hub.

DINP6 – ABEC3 Ball bearings with specially designed Factory-Links seals for Off-Road use.

Factory-Links ball bearing are a dedicated off-road design. Which feature dust seals that offer the ultimate protection against intrusion of contaminants such as water, mud and dust.

Factory-Links oil seals and ball bearings provide a categorical improvement compared to conventional bearings.

Factory-Links bearings are packed with a premium heavy duty marine grease with addition of special complex thickeners to allow them to be virtually waterproof, leaving the wheel bearing greasier than a halal snack pack at 3am.

To further aid keeping moisture out, Factory-Links have gone from 30% grease filling to a 60% grease filling for harsh conditions.

Factory-Links ball bearings are specially developed for off road use, unlike Industrial 2RS type ball bearings which offer low torque resistance and hence weak resistance to water intrusion.

Factory-Links bearings provide unsurpassed rust and corrosion protection.

# Swing Arm Bearing Kits

### HEAVY DUTY THRUST NEEDLE BEARINGS

Heavy duty thrust needle bearings handle much larger radial and thrust loads.

Unlike cheaper solution as POM, they also provide a much lower coefficient of friction between the swing arm and frame.

### HEAVY DUTY NEEDLE BEARINGS

Heavy duty needle bearings are full complement drawn cup.

The needle bearings are made of induction hardened SPCC steel with internal clearances making them particularly suitable for the high shocks and loads endured during off road racing use.

**COLLARS:** Collars are precision turned, polished, hardened to HRC48 and then Zinc plated. All steel used is automotive standard SPCC steel.

**DUST SEALS:** Dust seals are made of Nitrile Butadiene Rubber and strictly moulded to exact OEM specifications. The seals prevent abrasives, corrosive moisture and other harmful contaminants from entering bearings.

**PINS:** Pins are precision turned, induction hardened and polished in accordance with tolerances set by the vehicles' manufacturer. The material used is SAE52100 high-grade bearing steel, it is hardened to above HRC60 and the raceway is

**LET'S RIDE WITH FACTORY LINKS**  
Parts certified for the most extreme conditions

# Lower Shock Bearing Kit

Factory-Links premium kits contain all elements required for a full OEM quality service of your lower shock.

The dedicated off-road design of Factory-Links needle bearings, collars, pins and dust seals are specifically manufactured in terms of materials, dimension tolerances, hardness and surface roughness in order to reach the stringent OEM quality requirements.

### HEAVY DUTY NEEDLE BEARINGS

## Linkage Rebuild Kit

Factory-Links premium kits contain all elements required for a full OEM quality service of your linkage.

The dedicated off-road design of needle bearings, collars, pins and dust seals are specifically manufactured in order to reach the stringent OEM quality requirements, in terms of materials, dimension tolerances, hardness and surface roughness.

Factory-Links kits will bring your bike linkage back to its former condition as defined by manufacturers.

### HEAVY DUTY NEEDLE BEARINGS

All needle bearings are full complement drawn cup, hardened SPCC steel with internal clearances making them particularly suitable for the high shocks and loads sustained during off road racing use.

**PINS:** Pins are precision turned, induction hardened and polished in accordance with tolerances set by the vehicles' manufacturer. The material used is SAE52100 high-grade bearing steel, it is hardened to above HRC60 and the raceway is then precision grounded.

**DUST SEALS:** Dust seals are made of Nitrile Butadiene Rubber and strictly moulded to exact OEM specifications. The seals prevent abrasives, corrosive moisture and other harmful contaminants from entering bearings.

**COLLARS:** Collars are precision turned, polished, hardened to HRC48 and then Zinc plated. All steel used is automotive standard SPCC steel.

Linkage service kit includes lower shock absorber service kit.

# Steering Head Bearing Kits

OEM quality replacement kit for steering head. Contains all replacement parts for a complete rebuild.

Factory-Links kits will bring your bike's steering stem back to its former condition as defined by its manufacturers.

**Tapered Bearings:** Factory-Links tapered bearings are grinded to an accurate angle in order to assure smooth operation and be able to sustain high impact-shocks.

**DUST SEALS:** Designed to match each type of tapered bearing and steering column to assure the best containment of the dust and water. Dust seals are made of Nitrile Butadiene Rubber and strictly moulded to exact OEM specifications. The seals prevent abrasives, corrosive moisture and other harmful contaminants from entering bearings.
